

THE FUTURE OF LEARNING

Update 1-31-19

Real-World Learning

Educators are emphasizing the need for real-world learning that capitalizes on outdoor experiences.

Supporting Academics

The Learning Leaders Forums (teachers and principals) are providing valuable input about what types of spaces best support academic excellence. Working groups will be studying specific issues identified by the Steering Committee such as the Kearns Campus development, grade realignment, and school and class sizes.

Quote

"Park City School District's number one priority is academic success and excellence. It is the foundation of everything the district strives for and the bedrock of the district's mission and values."

– Superintendent Jill Gildea –
